

Somatuline® Autogel® (lanreotide) injection tracker

Use this tracker to keep a record of your Somatuline® Autogel® injections.

1

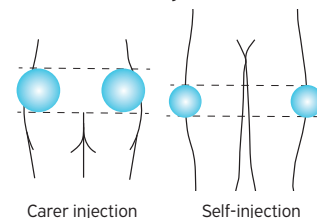

Fill out a **new row** on the tracking table overleaf for each Somatuline® Autogel® injection.

2

Fill out all sections of the tracking table.

3

Alternate the injection site for each injection.

4

Note the **date of your next injection** in the tracking table.

5

Please also read the **Somatuline® Autogel® Consumer Medicine Information (CMI) leaflet** available in your Ipsen Assist Welcome Pack or on the Cohere™ app before your injection.

If you have any questions about Somatuline® Autogel® or how to inject, please discuss these with your healthcare professional.

Storing and travelling with Somatuline® Autogel®

Somatuline® Autogel® should be kept in the fridge between 2 and 8° Celsius in its original packaging and out of reach of children. It should never be frozen.

Somatuline® Autogel® can be temporarily removed from the fridge up to three times, but for no longer than 24 hours in total and always below 40° Celsius. As such, you should have enough time to travel with your syringe without needing refrigeration, e.g. taking it home from the pharmacy. For more information on storing Somatuline® Autogel®, please read the CMI leaflet available in your Ipsen Assist Welcome Pack or on the Cohere app, or speak to your healthcare professional.
